

Datasheet: Unitrends Endpoint Backup

A DIRECT-TO-CLOUD BACKUP SOLUTION DESIGNED TO PROTECT ANY WINDOWS WORKLOAD ANYWHERE, AT AN UNBEATABLY LOW PRICE.

Unitrends Endpoint Backup is designed to protect your Windows servers, virtual machines, cloud instances, desktops and laptops from data loss. Ensure no data goes unprotected with a resilient, cost-effective backup and recovery solution. Endpoint Backup enables the restoration of the entire system or select data if either downtime or data loss occurs.

Protect all data wherever IT lives™

Although all data is critical, implementing backup for every Windows endpoint across your organization can be costly and complex.

But no longer!

Now, you can back up all Windows systems — in primary data centers, at remote or distributed locations, in virtual machines, in any cloud, in the office or with remote employees. Leave no workload behind!

Industry-leading affordability

At Unitrends, we set a vision many years ago to create a world where data loss and downtime are nonexistent — and to achieve it, backup and recovery are a necessity, not a luxury. Unitrends Endpoint Backup enables organizations to protect every Windows endpoint with unparalleled affordability, setting a new industry standard for cost-effectiveness.

Everyday data protection

Unitrends Endpoint Backup ensures complete protection against common everyday data loss scenarios, including accidental deletion, hardware failure, ransomware attacks and lost or stolen devices.

Reliable, appliance-free Windows backup

Unitrends Endpoint Backup leverages image-based, direct-to-cloud backup technology, eliminating the need to procure and manage additional hardware. Backups run automatically every two hours and are stored directly in the Unitrends Cloud, ensuring your data is protected no matter what.

Unified experience

Unitrends Endpoint Backup is managed through the familiar and proven Backup Portal. This system provides a unified dashboard that integrates with both Unitrends Backup for Microsoft Azure and Unitrends Endpoint Backup with Disaster Recovery solutions. This centralized management interface streamlines the oversight of all your direct-to-cloud technologies, boosting administrative efficiency.

Unitrends Endpoint Backup

Unitrends Endpoint Backup delivers resilience for any Windows endpoint in a compact, direct-to-cloud backup and recovery solution without the need for an appliance. Single-pane-of-glass management, easy deployment and streamlined day-to-day operations make backup and recovery seamless — all delivered at an unbeatably low price.

The solution offers replication to the secure and private Unitrends Cloud every two hours to protect data from downtime, cyberattacks and outages.

Enterprise-grade protection

- » **Proven backup solution** built on 30+ years of experience delivering data protection and continuity across endpoints, servers and the cloud.
- » **Peerless resilience** with backup to the secure and reliable Unitrends Cloud ensures data protection and easy, fast recovery.

Rapid, reliable recovery

- » **Backups every two hours** to the secure Unitrends Cloud enable maximum redundancy and optimal recovery time objective/ recovery point objective.
- » **Streamlined recovery** via a simple restore process managed through a single, intuitive interface, enabling recovery of multiple files, folders or the entire disk as required.

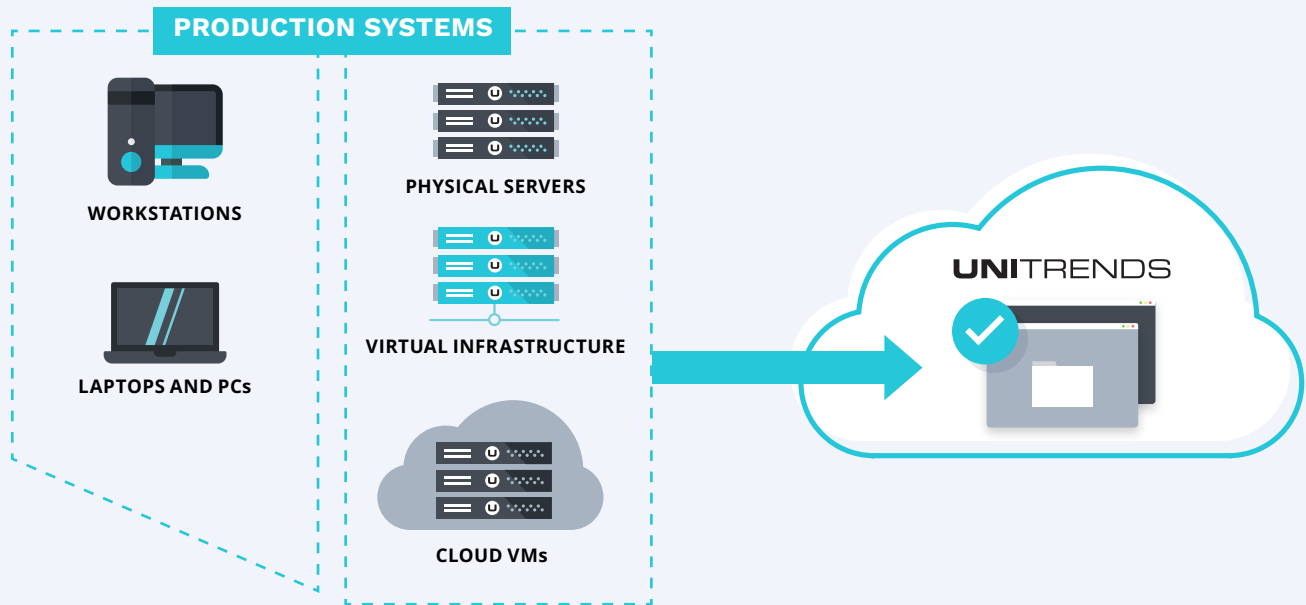

How it works

Unitrends Endpoint Backup automatically backs up protected systems to the secure, immutable Unitrends Cloud every two hours. Additionally, the data is encrypted both in-transit and at-rest, ensuring maximum security. All backups for a protected asset are independent and readily available for recovery without the need for rehydration, synthetic backups or recovery chains.

Unitrends Cloud

The Unitrends Cloud is purpose-built for backup and disaster recovery. Its immutable architecture sets the standard for secure cloud infrastructure and provides you with a consistent stack to protect servers, VMs, cloud instances and endpoints. A multiregional presence supports geographically redundant backups and enables customers across the globe to meet compliance and data sovereignty requirements.

Features and system requirements

Operating systems	<ul style="list-style-type: none"> » Windows Server 2022 / 2019 / 2016 / 2012 R2 (64-bit) » Windows 11 / 10 (64-bit)
Security	<ul style="list-style-type: none"> » Forced multifactor authentication (MFA) to management portal » Data encryption in-transit and at-rest
Recovery options	<ul style="list-style-type: none"> » File/folder recovery, including self-service » Bare metal recovery (BMR) to the same or dissimilar hardware » Image export to virtual machine format
Unified Backup portal	<ul style="list-style-type: none"> » Shared with Unitrends Backup for Microsoft Azure and Endpoint Backup with Disaster Recovery » Monitoring of on-prem, remote and cloud systems » Detailed status page with backup status, recent backup status and settings
Bandwidth throttling	<ul style="list-style-type: none"> » Limit internet connection usage to reduce impact on production workloads and applications
Email alerting	<ul style="list-style-type: none"> » Receive alerts on the status of backups

ABOUT UNITRENDS

Unitrends makes efficient, reliable backup and recovery as effortless and hassle-free as possible. We combine deep expertise gained over thirty years of focussing on backup and recovery with next-generation backup appliances and cloud purpose-built to make data protection simpler, more automated and more resilient than any other solution in the industry.
